## SUMMARY

My experience in software development and multimedia creative fields, notably front-end development and project management, allows me to design visually attractive interfaces while continuously delivering great outcomes.

## EXPERIENCE

### Youth Content Creator

TILT | January 2022 - January 2023

I successfully completed the Youth Employment Service quality work program under TILT, which provided me with the necessary skills to produce exceptional creative materials for businesses. Through collaborative efforts, I had the opportunity to work alongside renowned companies such as Pizza Hut, gaining valuable experience and contributing to their success.

### AMBASSADOR OF THE HUAWEI ICT ACADEMY

Huawei | June 2022 - December 2023

Through my effective execution of impactful events, compelling content creation, and strategic communication, I achieved remarkable success in promoting the ICT Academy. I harnessed the power of networking with industry professionals and dedicated myself to mentoring aspiring ambassadors, leading to significant growth and increased visibility for the Academy.

### Front-End Developer (React.js)

Debonairs | December 2019 - Present

The individual developed a responsive web application using React.js, enhancing user engagement and reducing page load times. They collaborated with UX designers, managed data flow using Redux and Axios, and mentored junior developers, showcasing their proficiency in front-end development.
